Website Designing - HTML5 - Full stack and Back end

1. What are the new tags added in HTML5?

- audio, datalist, details, footer, canvas, nav, header, section, svg, video, time, hgroup, command, article, aside.

2. How to embed audio and video in a webpage?

For audio we use,
-   `<audio>`
-   `<source src=" " type=" " >`
-   `</audio>`

For Video we use,

-   `<video>`
-   `<source src=" " type=" " >`
-   `</video>`

3. Semantic element in HTML5?

- Semantic element are define it's content
- Ex. `<form>`,`<table>`,`<article>` are semantic element.

4. Canvas and SVG tags

- SVG - SVG is Scalable Vector Graphics. SVG is useful for defining graphics such as boxes, circles, text, etc.

- Canvas- The HTML <canvas> element is used to draw graphics, via JavaScript.
